

PE 4000 Series Rider Pallet Trucks

1. The risk of contact with the power unit can be substantially reduced by these simple operating guides. D
2. The grade rating and other important truck capabilities should be noted during the truck pre-inspection. D
3. Raise the forks for better underclearance and fork protection. B
4. Always maintain alertness when traveling at high speed. C
5. All are standard on PEs. A
6. You must press the high-speed button for top travel speed. Maintain Alertness! A
7. Remember, the truck can weigh almost 10,000 lbs. A
8. The optional coast selector only prevents the brakes from being applied when the handle is released to the up position. The brakes may still be applied manually if the operator keeps his hand on the handle and moves it into either the up or down brake position. B
9. Always use extra care on ramps. D
10. All elements are important to protect others and the truck. D
